### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed on 02/05/07 after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/05/07 has been entered.
2. Claims 1-20 are cancelled. Claims 1-6 are cancelled via Examiner's Amendment (see below) and claims 7-20 are cancelled by the Applicant in the amendment submitted on 02/05/07. Claim 21 is allowed.
3. All of the previously made art rejections are withdrawn.
4. A preliminary amendment to the specification (including the abstract) received on 02/14/05 is reviewed and entered.
5. Drawings submitted on 02/04/04 and 02/14/05 are accepted.

### ***Examiner's Amendment***

6. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Yen Tong Florczak on 04/10/07.

The application has been amended as follows: Claims 1-6 are cancelled.

***Reasons for Allowance***

7. The following is an Examiner's statement of reasons for allowance:

The prior art of record fails to teach the presently claimed limitation of "a second cover layer having an outer face and an inner face...the second paperless zone on the front side of the paper layer."

The most pertinent prior art is US 3,517,106 to Chase. Chase teaches methods and materials for mounting illustrations, clippings, pictures and the like in accurate position on mounting boards, picture-album pages, and like support (column 1, lines 13-16). Chase discloses a paper web (W) coated on both sides with a pressure sensitive adhesive (A) and a release sheet that is made of easily separable sections IR and ER (Fig 1 and 2 of Chase and page 3 of 08/09/06 Office Action). The release sheet of Chase is equated to the paper layer as claimed and the pressure sensitive adhesive coated paper web W of Chase is equated to a cover layer having the pressure sensitive adhesive disposed on its inner face as claimed (see page 4 of 08/09/06 Office Action).

Chase does not teach or suggest a second cover layer having a pressure sensitive adhesive disposed on its inner face. Additionally, Chase does not teach or suggest that the pressure sensitive adhesive on the inner face of the second cover layer is exposed across the second paperless zone on the front side of the paper layer. One skilled in the art would not have been motivated to add an additional cover layer with a pressure sensitive adhesive on top of the release sheet of Chase because to do so would destroy its intended utility.
